The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Avra Leigh

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

"The world we've made, as a result of the level of thinking we have done thus far, creates problems we cannot solve at the same level of thinking" Albert Einstein. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jan Stautz-Hamlin

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Laura Milbury

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patricia Berezcki

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Bernice Upin

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. When AT&T took over BellSouth all we got were higher prices. They won't even offer me DSL where I live although people who live less than 2 miles away have it through AT&T. AT&T acts like we don't exist unless of course if we are late paying our bill. They don't need to get bigger and they definitely need to take care of the customers they already have. I thought the big monopolies were supposed to be a thing of the past but it seems that they are coming back with a vengeance against the consumer.

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Bridges

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I'm old enough to remember when Bell Telephone was broken up into the "Baby Bells." My thought at the time was that in time, the communication industry would morph back into one or two megacorporations which would control access to and quality of communication services. It is not in the best interest of consumers and I urge you to prohibit the takeover of T-Mobile by AT&T. There are anti-trust laws for a reason: to protect consumer's pocketbooks and to help ensure, in the case of communication issues, that the public enjoys choices of and access to high quality, non-censored services. It is competition which drives companies to provide the services consumers prefer at prices that are fair to the consumer yet allow for reasonable profits for the company and it's shareholders. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. I ask that you serve the public interest and not allow this merger to occur.

Sincerely,

Noel Yates

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Herb Gartsman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I adamantly oppose the transfer of control of T-Mobile's licenses and authorizations to AT&T (Docket No. 11-65). AT&T has proven that it has no intention of offering consumers reliable, meaningful choices by plotting to abolish land line phones. This is highly dangerous because in every natural and man-made disaster, from 9 - 11 to Katrina, and more recently tornado-hit Missouri, it is cell phones, not land lines, that fail. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and proof that we need anti-trust laws. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. Furthermore, AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in phone services and block this takeover.

Sincerely,

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Megan Hefner

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rex Riddle

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mac mc cabe

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

As an American, I believe good business depends on smart regulation and good competition. Our anti-trust laws are supposed to protect customers from the dishonest business practices that come when too few businesses control the market, and provide freedom for smaller businesses to compete fairly. The FCC has a special responsibility to protect our constitutionally-guaranteed freedom of speech. ATT has a history both of monopolistic unfair business practices, and of censoring content. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Linda Letendre

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

If this is truly a different FCC from the last administration, you will consider the harm to the people of this country by reducing competition which will inevitably bring our choice down to only two players who matter, AT&T and Verizon. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Revjohn Bliss

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC must not consent to any kind of transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). This \$39 billion dollar proposal to take control over T-Mobile contains nothing good for consumers, and is an excellent example of what our anti-trust laws are meant to prevent. Should this be approved, a virtual duopoly for mobile phone service will be in place – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. Furthermore, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. Also, AT&T has a history of censoring content and blocking phone features it doesn't like. Should AT&T be permitted to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I must ask the FCC to protect competition in mobile phone services and block this unacceptable takeover.

Did we learn nothing from the vote to approve the Comcast - NBC merger and Ms. Baker's immediate departure to join the monster she helped create? Did we learn nothing from the 1984 breakup of the AT&T monopoly? The FCC is supposed to safeguard consumers, not rich, fat-cat corporations. Start doing your job, please.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Eliza Hobson

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Really, is having just one media company a good idea? With all the mergers, buyouts, and takeovers, that's exactly where we're headed! One company that can charge as much as it wants, and provide as little service as it wants. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Dave Kraus

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Max Magbee

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Suzi Campbell

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). The quality of our communications marketplace is at stake. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. There is no way that this will benefit consumers or the overall economy of this country. The interests of American citizens far outweigh those of AT&T. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. Therefore, the merger should be blocked. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Renee Schafer

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joseph Zakrzewski

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Grace Turner

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

So has the definition of "MONOPOLY" changed? And has the consequences of them to the public & to our democracy disappeared? Has the consciences of those in the FCC disappeared with them? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Costa Chitouras

To the Federal Communications Commission,

Dear Folks at the FCC, I strongly feel that there should be NO MERGER of AT &T with T-Mobile. Our anti-trust laws are meant to prevent these giant corporations from controlling markets and consumer options. Please consider carefully the repercussions of the merger, and prevent the 'takeover' of T-Mobile.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joseph Teixeira

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Paco Verin

As a T-mobile and AT&T customer, I know that such a merger will be awful for consumers who need to use communication tools. AT&T, in my experience, provides horrible customer service. A merger between T-Mobile and A&T will only shrink the customer's options for communication services and would put too many public communications in the hands of a single corporation and I fail to see how that could be good for anyone.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. What the FCC SHOULD be concentrating on is breaking up AT&T...Again! Even though this iteration of AT&T is not the same as the original Bell system is is been on the same monopolistic, hegemoniacal path as the original telephone monopoly. It is clear that their ultimate goal is total control of cellular communication, the Internet, and television cable distribution. Don't let them do that. Stop them now! The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. If I were in charge, I'd be trying to put AT&T totally out of business—and then I'd go after Verizon! Monopolies are not the answer. They are, by nature, counter-competitive, undemocratic and unresponsive to social needs and values. If the FCC is unwilling to stop the proposed merger, it reveals itself to the American public as just another tool of monopolistic telecommunications interests.

Sincerely,

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Theresa Daven

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. It was not that many years ago that the phone service monopoly was broken into regional independent companies to "promote competition" The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The proposed takeover would lead to higher prices and stifle choice and innovation in the market place and runs directly counter to this mandate and a big step backward for the American public and our access to true choices re our servers. Additionally, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. We currently have a "system" that is monopoly controlled, and AT&T has a history censoring content and blocking phone features it doesn't like. These all jeopardize the concept of free speech. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

William Bishop

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

When, exactly, are you all going to stop being the industry captured agency who spends its every waking moment screwing the American people. I no longer refer to us as the middle class because that group is now so small as to be insignificant. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Walter Kortge

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Robert Johnson

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Julie negrin

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ena Dubnoff

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). **BREAK UP COMCAST, STOP ALL COMMUNICATIONS MERGERS.** AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Judith Sanders

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Janet Noonan

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Tim Redmond

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). We have anti-trust laws to protect our citizens from the depredations that monopolies (and duopolies) inevitably wreak on our markets. It's in the public interest for the mobile phone market to have a healthy competition of more than 2 companies. If the buyout is allowed to go forward, 80% of mobile phone business will be in the hands of 2 companies. As a Verizon customer now in a rural area, I already live under a virtual monopoly. It's no fun having no choices when it comes to a vital service which is a basic utility (but privately run, not publicly accountable). Verizon's customer care and pricing policies are outrageously extractive, because they know they have a monopoly in many parts of the country. Don't subject MORE customers to the same treatment I must endure. Thank you for the opportunity to comment. And, God bless America: land of healthy competition.

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Margaret Benefiel

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Hey FCC, don't betray the American People. Don't transfer control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I remember the bad old days when AT&T owned all long-distance service in the U.S.A. Calls cost over \$0.25/minute (that's over fifty cents in today's dollars!). When the Reagan administration broke that monopoly, it scored an astounding consumer victory that eventually brought the street price of long distance down more than twentyfold. In other words, the cost of monopoly to the consumer was 95% of the service rendered. But the cost to business itself was even greater. Competition allowed numerous new providers to operate profitably, bringing forth a wide range of new services and inventions. Suddenly, the average person could actually own a phone, and it didn't have to be black. And that phone had call waiting, call forwarding, speed dial, caller ID, etc. Competition created new businesses, new jobs, new economic sectors. The Reagan revolution paid vast dividends to both Main Street and Wall Street. The current proposal gives AT&T too big a slice of the pie, which automatically turns the clock back toward an era of outrageously higher prices, fewer services, fewer businesses and fewer jobs. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. I'm also concerned that consolidation of media and telecom threatens the ready access to information so necessary to democracy and government accountability. AT&T apparently has a history censoring content and blocking phone features it doesn't like. As a consumer who remembers, as a freedom-loving patriot, I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block AT&T's takeover of T-Mobile.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Harriet Boylan

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

N. Bliker

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. This is ridiculous first you break apart the phone company and now you allow them to buy up all the competition. AT&T can't handle what it has - why should they be allowed to take over another company? AT&T constantly sends employees to sell their U verse stating that our neighborhood has fiber optic cables. It is an outright lie. We need more competition not less. AT&T is constantly overloaded due to iphones, ipads, and so called G4 usage. Allowing them to take over T-mobile is unacceptable.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kevin Lacey

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. We have already lost so much control of big business that does things like moving offices overseas and does not pay taxes and many such other abuses, don't let another one occur. The majority of the population is already suffering because taxes have not been raised for million and billionaires. Stop ATT

Sincerely,

Isabel Sobol

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Harris

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Anne Showalter

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Stop ATT from taking over T-mobile and then using its monopoly power to raise my rates and limit my current options at T-mobile or even eliminate or otherwise mess up my low cost pre-pay options. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rabbi Jeff Foust

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Paul Martin

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Naomi Arad

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kimberly Klein

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Judy Kenney

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Martin

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Robert Heinz

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

We need more competition, not less. Real competition, not just a couple of massive companies. We need more choices, not less. We need the ability to decide levels of service and pricing, not have these dictated to us. With the almost total lack of regulation or oversight that we now have, a merger such as this will be a disaster. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I implore the FCC not to consent to the transfer of control of T-Mobile's licenses, etc. to AT&T (Docket No. 11-65). AT&T's proposal to take over T-Mobile can bring nothing but bad news for consumers. Please enforce our antitrust laws – they are there for sound historical and economic reasons! Should AT&T's proposal be approved, a mere two companies (AT&T AND Verizon) will control 80% of the mobile market. The FCC exists in part to encourage and support competition. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. I urge the FCC to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

This one will be front-and-center of the classes I'll teach to entering college freshmen and to seniors when I teach antitrust in the fall. Never mind that we have a statute preventing mergers where the effect "may be substantially to lessen competition, or to tend to create a monopoly"! It's well known that corporate power can readily trump statute. The question is whether the FCC will stand up for consumers against AT&T, notorious for its poor service! Take a look at your own strategic plan, quoted below! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Donald Squires

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I have AT&T service because they took over Altel. I am now stuck with a two year contract with AT&T. It is not a very good service. It is slow sometimes, often doesn't show my voice mails, and the billing is questionable. I was hoping when my contract runs out, to go to back to T-Mobile, but you may make this impossible. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Linda McCormick

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

AT&T has regrouped since its breakup and is back to abusing the American consumer. Not only must the FCC not allow a merger, in fact, it should recommend to the justice department that the company be broken up again. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Cecilia Fasano

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers.
